

The Certification Body of the IDSA  
hereby certifies that the

INTERNATIONAL DATA  
SPACES ASSOCIATION

# T-Systems Data Intelligence Hub (DIH) connector

of

## T-Systems International GmbH

meets the requirements

### Trust Level 1, Assurance Level 2 IDS Certification for connectors

as specified in the evaluation result.

The evaluation result and certification requirements are referenced in the annex to the certificate.

This certificate with the registration number **IDS-CON-0001-TL1-AL2-2023** is valid until **01.12.2025**.

# Certificate

## Certification requirements

The certification was carried out on the basis of the following framework conditions:

<b>Certification item</b>	T-Systems Data Intelligence Hub (DIH) connector version 1.1.1
<b>Certification Version 1.0</b>	IDS Reference Testbed: v1.1.0 Certification scheme: v2.0 Connector certification criteria catalogue: 2.1.2
<b>Rules of procedure</b>	IDS Certification of IDS Operational Environments and IDS Core Components v1.3
<b>Evaluation report (confidential)</b>	Evaluation report for T-Systems International GmbH, report version IDSA-IDS-CON-0001 v1.1 for T-Systems Data Intelligence Hub (DIH) connector from 24.11.2023 by Software Quality Systems (SQS)
<b>Evaluation results</b>	The Connector fulfills the IDSA criteria for secure authentication and communication with other connectors, usage control, full interaction with the MetaData Broker, self-description management, secure development process and applicable security mechanisms.
<b>Application remarks</b>	The T-Systems Data Intelligence Hub (DIH) connector has to be used with an associated platform that provides user management, non-repudiation, authorization enforcement, audit logging and storage, resource management, protected network connection and is developed under a secure development life-cycle.
